

01. Reinsert the groundsheet underneath the inflatable canopy.
02. Remove any walls and fold them away.
03. Open a valve to release air with a minimum of two people supervising - unscrew the outer grey cap and press the central spring button in until locked open.
04. Remove weight plates and fold each leg under the canopy material
05. Set the pump to deflate mode and run until all air has been withdrawn. Make sure the second valve is closed on the opposite leg of your inflatable canopy if applicable.
06. With a person on each of the back two corners, fold the unit in half by bringing the back over and on top of the front.
07. Fold in half again, as shown in the picture.
08. Roll the canopy up, as shown in the picture (minimum two people).
09. Stand the unit up on one end and slide the bag over the top half (minimum two people).
10. Maneuver the inflatable canopy so that it is fully in the bag and turn it over so that the open end is at the top (minimum two people).
11. Add any walls & accessories to the bag.
12. Zip up the bag and remove the groundsheet (store separately). If the inflatable canopy is still damp when packed away please ensure it is dried at room temperature within 48hrs.

For more detailed instructions on how to use the pump, please refer to page 3.
