

01. Place the tarpaulin mat under the dome.
02. Remove any side walls or other accessories that may be attached to the dome and fold them away.
03. Unscrew the complete bung from the valve on the two rear legs.
04. Place the deflated legs under the front legs that are still inflated.
05. Release the bungs on the front legs and allow air to release naturally for 4-5 minutes.
06. Fold the dome in half so that all four legs are in one line.
07. By hand, roll the dome from top to bottom, expelling any remaining air in the legs.
08. Place in bag. If goods are wet when packed away please ensure they are air dried at room temperature within 24 hours.
09. Fold away the tarpaulin mat and store separately if dirty or wet.
